To repeat something I mentioned when you talked to me on the street this morning. I am living on the street because my belongings are stolen by the persecutor group which include foreign persecutors and local authorities, and more.

I was an asylum seeker (not an illegal migrant) and was living on asylum support and at a supposed asylum accommodation. There were other problems but let's leave it for now.

If you are to help, the first thing I need would be the return of my belongings.

It's completely absurd and unacceptable. Without the return of my belongings I think it can be said that I don't enjoy the basic human rights.
